Fake Repeatable Surveys Documentation

Email Alerts V1.0

By Eva Bascompte

Uses for this module

This module's main use is to have a Survey that acts as the main one and a repeatable copy with all the saved records as instances.

Every time the main survey is saved, it will create a new instance with that information in the copied instrument.

One use for this is to have a unique link in an email were, every time the email is sent and the survey filled, the data saves as repeatable in the copied instrument. This way the information is associated in a record and not a record itself.

Note: This module won't work for longitudinal projects.

Configure the module

To configure the module, after enabling it in External Modules, click on the **Configure** button.

| Project Settings	Value
1. Repeatable Survey:	+
1. If an instrument with **variable_name + suffix** already exists, the new instrument won't be created.	
1. Survey: * must provide value	▼
1. New instrument name: * must provide value	
1. Suffix appended to variable names: * must provide value	

The configuration fields of the module are:

Survey: The survey to copy.

New instrument name: The name of the copied instrument.

Suffix appended to variable names: suffix that will be added to the variable names.

An example of how to fill up the information:

Project Settings	Value
1. Repeatable Survey:	+

1. If an instrument with **variable_name + suffix** already exists, the new instrument won't be created.

1. Survey: * must provide value	public_survey ▾
1. New instrument name: * must provide value	Instrument repeatable
1. Suffix appended to variable names: * must provide value	_2

On saving the configuration, the repeatable instrument will be automatically created. If that instrument already exists it won't be created.

Data Collection Instruments

Survey options:
- ☰ Survey Queue
- 🔑 Survey Login
- ✉ Survey Notifications

Add new instrument:
- ✚ Create a new instrument from scratch
- ⬇ Import a new instrument from the official REDCap Shared Library ⓘ
- ⬆ Upload instrument ZIP file from another project/user or external libraries ⓘ

Instrument name	Fields	View PDF	Enabled as survey	Instrument actions	Survey-related options
Public Survey	4	📄	✅	Choose action ▽	☑ Survey settings + Automated Invitations
Instrument repeatable	3	📄	✅	Choose action ▽	☑ Survey settings + Automated Invitations

The variables will be copied and the suffix added.

In this example the suffix is _2:

🖉 📋 ⬇ ➕ ✖   *Variable:* text

My text

[   ]

🖉 📋 ⬇ ➕ ✖   *Variable:* text_2

My text

[   ]
